- STI screening
  - New patient clinics
  - Patients on ARVs
  - CNS and consultant roles

# Overcoming Barriers to Nurse-led Care

- National
  - Policy to develop nursing roles
  - Specialist training
  - Utilise existing evidence
  - Chronic disease models
  - Patient representation
- Local level
  - Identify local needs
  - Identify skills required to deliver
  - Develop local protocols and training
  - Work with patients in planning and delivering
  - Audit nurse-led care
  - Share with others

**Focus on what nurses do best and build on that foundation**
